為配合澳門特別行政區政府環境保護局「源頭減廢、資源回收」的固體廢物處理政策，減少大型活動耗用自然資源及過後對廢物處理設施造成的壓力，響應綠色會展倡議，大會建議參展商及承建商參考《大型活動的減廢指引》採取以下措施：

4.1 參展商

- a. 建議展位設計遵從減少、重用及回收的原則，使用環保物料，以減少搭建時造成的廢棄物。
- b. 優先使用含有再造成分的產品，如再造紙、橡膠地墊、以及其他回收物料。避免使用由聚氯乙烯（PVC）製作的佈置材料，避免使用一次性的大型道具或活動設備。
- c. 鼓勵現場盡量不售賣塑膠瓶盛裝的水或飲品。與觀眾互動活動，鼓勵參與者自備環保袋，以及可循環使用的餐盒、餐具和水杯，減少一次性塑膠瓶的使用，並溫馨提示有關用品應事先清潔好。
- d. 現場派發的紀念品，應考慮少包裝、簡約、具實用性等綠色原則。

4.2 承建商

- a. 建議現場謹慎裝潢及拆除攤位，以提高物料重複使用的可行性及比例；而不可重複使用的材料，請妥善進行分類及資源回收。
- b. 現場廢棄物料須分類回收，包括：紙類、塑膠、金屬、玻璃樽、電池等類別。回收處理須以清晰的類別名稱作提示，減少誤投機會。保持環境的清潔衛生。
- c. 撤展拆除大型展板及含有一定量的金屬支架之組件時，棄置前須對有關廢棄物作適當的預處理，將可重用的物料作（如金屬）拆解及回收，避免對垃圾焚化中心的運作造成影響。而可燃的廢棄物需切割成符合有關規定的尺寸（直徑不能超過 100 毫米）及長度（不能超過 3 米長），再運往垃圾焚化中心處理。

In response to the solid waste disposal policies of the Environmental Protection Bureau (DSPB) of Macao SAR featuring “waste reduction at source and waste recycling”, and the green exhibition initiative, for the purpose of reducing the natural resources consumed by major events and alleviating the consequent pressure exerted on the waste disposal facilities, the Expo organizers advise the exhibitors and contractors to take the following measures in line with the Guidelines on Waste Reduction of Major Events:

4.1 Exhibitors

- a. The booth design should follow the principle of reducing, reusing and recycling resources, and use environmentally-friendly materials, so as to reduce the wastes generated in the process of construction.
- b. Products containing recycled materials should be preferably used, such as recycled paper, rubber mats, other recovered materials, etc. Materials made of polyvinyl chloride (PVC), large disposable props or event facilities should be avoided in booth construction.
- c. Do not sell water or drinks in plastic bottles on-site if possible. During interactive activities with the visitors, it is better for the participants to bring their own environmentally-friendly bags, as well as reusable lunch boxes, cutlery sets and cups, and reduce the use of disposable plastic bottles. They should be reminded that some articles need to be cleaned beforehand.
- d. The souvenirs handed out on the site should follow the “green principle”, and have such features as less packaging, leanness and usability.

4.2 Contractors

- a. The booths should be decorated and dismantled with great caution, and in a way that practicability of reusing the materials and proportion of such materials can be improved; while those that cannot be reused should be properly sorted and recycled.
- b. The waste materials on the site, including paper, plastic, metal, glass bottle, and battery, should be sorted and recycled. The waste materials to be recycled should be marked with a clear category, so as to reduce the chance of misplaced materials. The environment should always be kept clean and healthy.
- c. After large display boards and assemblies with certain number of metal brackets are dismantled in a booth, relevant waste materials should be properly pre-treated before being disposed of, and those that can be recycled (e.g. metal) should be disassembled and recycled, so as to avoid any adverse effect on the operation of the incineration center. Combustible waste materials should be cut into required size (no more than 100mm in diameter and no more than 3m in length) before being transported to the incineration center for treatment.
